

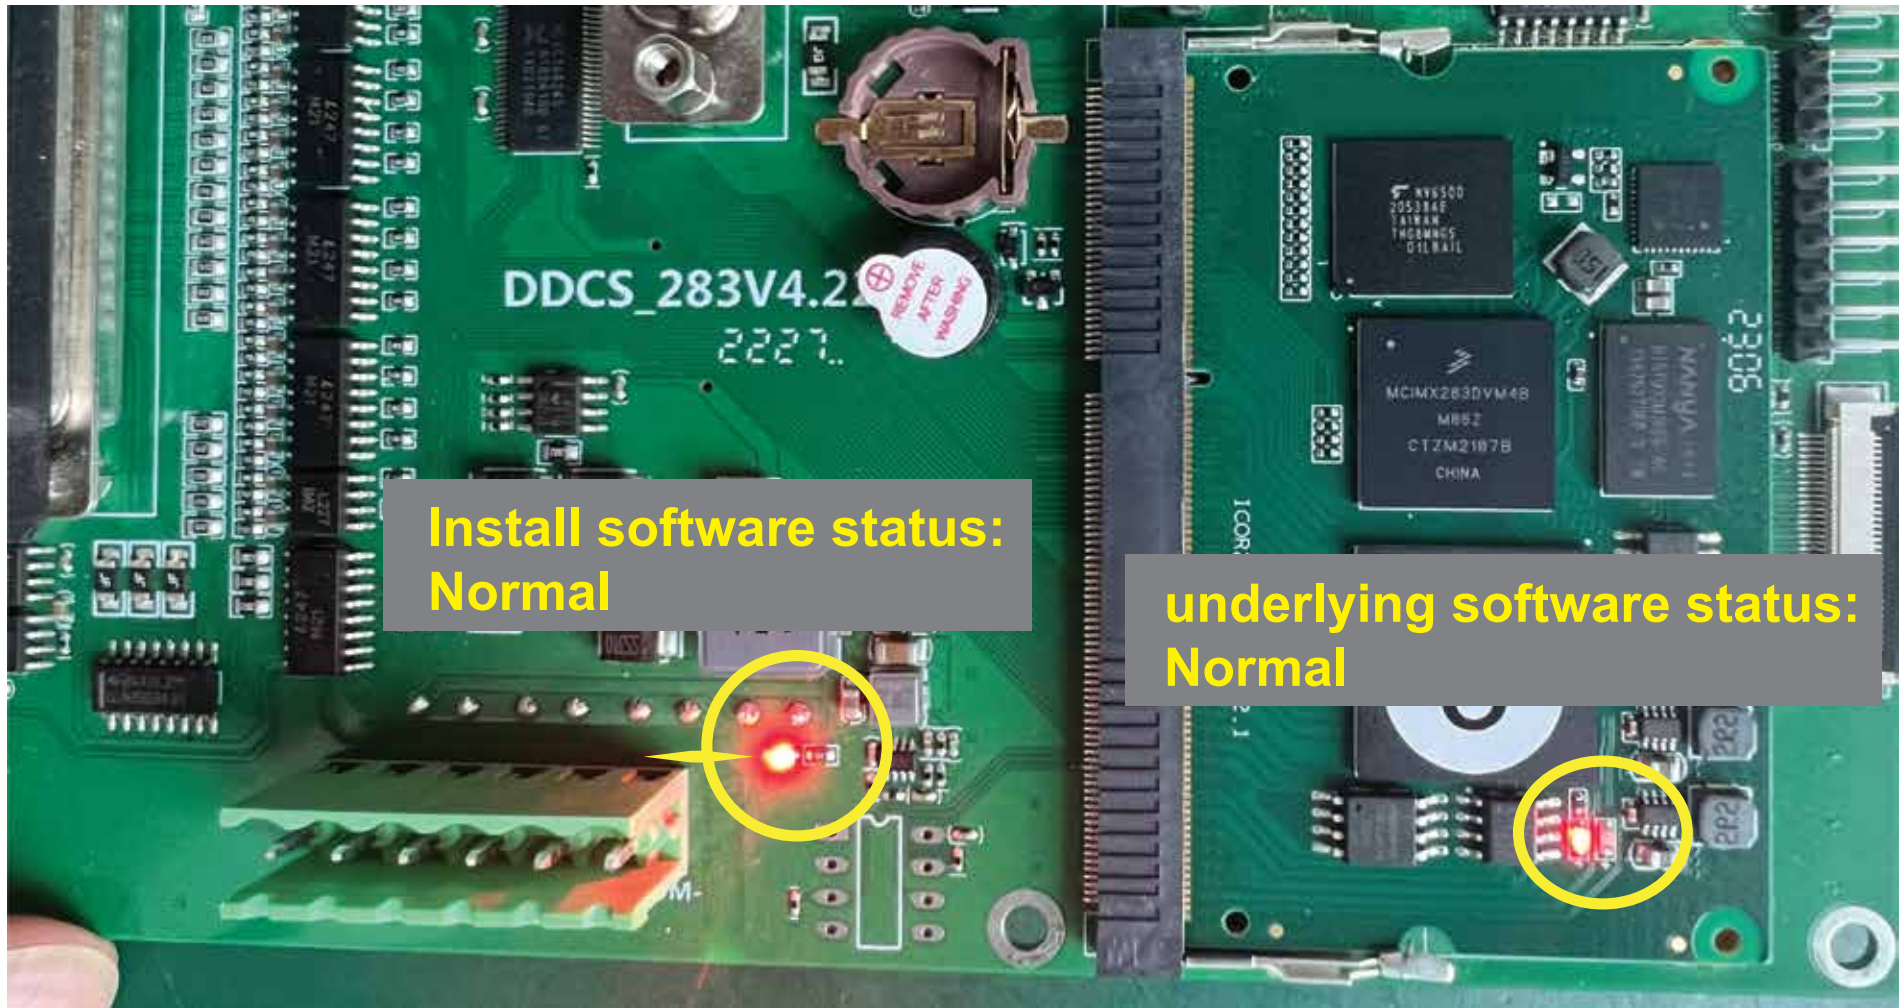

Figure 1

当控制器的底层软件和应用层软件都能被读取时,亮灯方向入以上图一,那么软件部分是正常的,需要排查其他问题。

When both the underlying software and Install software of the controller can be read, the LED Status is shown in Figure 1 above, then about the software, its without problem. Then go to page 3.

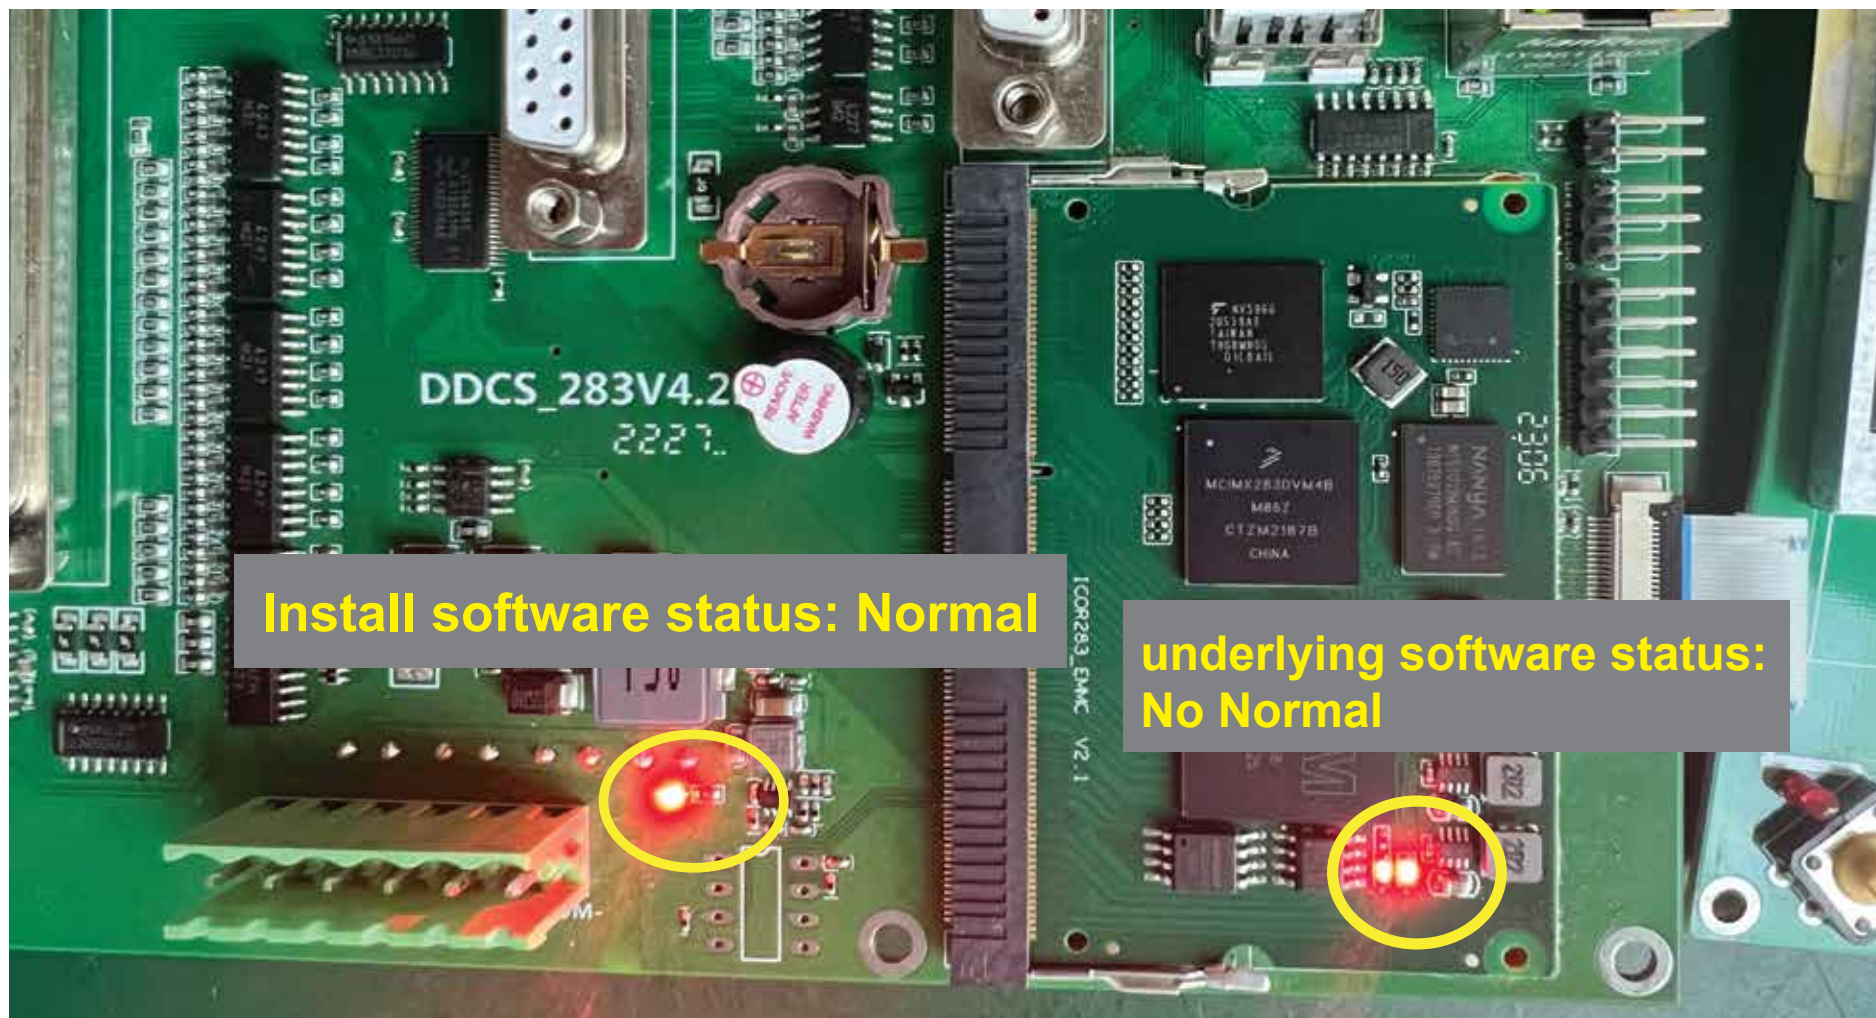

Figure 2

当控制器的底层软件不能够被读取应用层软件能够被读取的时候,控制器就会在开机画面出静止。

When the underlying software cannot be read, and Install software of the controller can be read, the controller standstill at the open page. Controller becomes failure.

Troubleshoot when DDCS V4.1 standstill at the open page?

Step 1: Install the software many times, check it becomes normal or not.

If not, go to Step 2 :

Open the cover of the controller, check the LED status of the install software and underlying software. Figure 1 and 2 can explained about it.

If same as figure 2, contact the factory to find solution at info@ddcnc.com.

If the LED status as figure 1 but still freezing at the open page, the go to step 3 as the Figure 3:

***To solve that the DDCS V4.1 standstill on the open page:
Remove the C180 and C188***
